1 Introduction **2**
- 1.1 Motivation . . . 2
- 1.2 Current progress . . . 2
- 1.3 Objective . . . 2

2 Conformal Field Theory and Conformal Blocks **2**
- 2.1 Review of Conformal Field Theory . . . 2
- 2.2 4-Point Correlators and Block Decomposition . . . 2
- 2.3 Recursion Relations . . . 2
- 2.4 Integral Representations . . . 2

3 Introduction to 2+1 Gravity **2**
- 3.1 Review . . . 2
- 3.2 BTZ black holes and Conical Defects . . . 2
- 3.3 Chern-Simons formulation . . . 2

4 AdS/CFT Considerations **2**
- 4.1 The Dictionary . . . 2
- 4.2 Witten Diagrams . . . 2
- 4.3 Mellin Representation of Witten Diagrams . . . 2

5 Virasoro Blocks and the Semi-Classical Limit **2**
- 5.1 Introduction . . . 2
- 5.2 Spectrum of Semi-Classical Limits . . . 2
  - 5.2.1 Global Limit . . . 2
  - 5.2.2 Heavy-Light Limit . . . 2
  - 5.2.3 Perturbative Heavy Limit . . . 2
  - 5.2.4 Non-Perturbative Heavy Limit . . . 2
- 5.3 Operator Exchange: Spinless vs Spinning . . . 2
- 5.4 Monodromy Method and Liouville Theory . . . 2
- 5.5 Holographic Computation . . . 2

6 Applications **2**
- 6.1 Rényi Entropy . . . 2

7 Conclusions and Discussion **2**

1 Introduction

1.1 Motivation

1.2 Current progress

1.3 Objective

2 Conformal Field Theory and Conformal Blocks

2.1 Review of Conformal Field Theory

2.2 4-Point Correlators and Block Decomposition

2.3 Recursion Relations

2.4 Integral Representations

3 Introduction to 2+1 Gravity

3.1 Review

3.2 BTZ black holes and Conical Defects

3.3 Chern-Simons formulation

4 AdS/CFT Considerations

4.1 The Dictionary

4.2 Witten Diagrams

4.3 Mellin Representation of Witten Diagrams

5 Virasoro Blocks and the Semi-Classical Limit

5.1 Introduction

5.2 Spectrum of Semi-Classical Limits

5.2.1 Global Limit

5.2.2 Heavy-Light Limit

5.2.3 Perturbative Heavy Limit

5.2.4 Non-Perturbative Heavy Limit

5.3 Operator Exchange: Spinless vs Spinning

5.4 Monodromy Method and Liouville Theory

5.5 Holographic Computation

6 Applications

6.1 Rényi Entropy

7 Conclusions and Discussion
